

Bo Zhang 张博

Undergraduate researcher | Department of Automation, Tsinghua University

bozhang23@mails.tsinghua.edu.cn | personal site

GitHub | Google Scholar

Education

Tsinghua University | Department of Automation 2023.09 – 2027.07 (expected)

B.Eng. in Automation | Multimodal Intelligence Honors Track

GPA 3.8/4.0 | class rank 61/172 | Class President of the Honors Track (2024 – present)

Selected courses: Pattern Recognition | Generative AI | Operations Research

Selected Publications

Computer-use agents | GUI grounding, training-free inference 2024 – present

BAMI: Training-Free Bias Mitigation in GUI Grounding

Borui Zhang*, Bo Zhang*, Bo Wang*, Wenzhao Zheng, Yuhao Cheng, Liang Tang, Yiqiang Yan, Jie Zhou, Jiwen Lu

*CVPR 2026 | * Equal contribution [code]*

AI for scientific discovery | embodied LLM agents in simulation 2025 – present

Grounding LLMs in Scientific Discovery via Embodied Actions

Bo Zhang*, Jinfeng Zhou*, Yuxuan Chen, Jianing Yin, Minlie Huang, Hongning Wang

*ICML 2026 | * Equal contribution [code]*

Research & Projects

SRT — GUI Desktop Visual Understanding 2024 – present

Tsinghua Student Research Training program | independent research

Visual understanding of desktop GUIs as a foundation for computer-use agents; methodological precursor to BAMI's bias-attribution analysis.

AICosmos — Educational Multi-Agent Platform 2025 – present

Contributor | incubated at Tsinghua's Department of Computer Science

Multi-agent platform composing tutor, role-play, and Q&A agents into a course-grade assistant. Live at aicosmos.ai.

AEI4U — AI Teaching Assistant for Analog Electronics 2025

Project Lead | built on the Dify-THU platform

Course-grade AI TA with circuit-topology recognition, SPICE-in-the-loop simulation, and adaptive learner profiling. **Grand Prize**, Tsinghua 43rd Challenge Cup, AI Teaching-Agent Design Track.

Honors, Patents & Service

Honors	Grand Prize, Tsinghua 43rd Challenge Cup — AI Teaching-Agent Design Track (2025)
Patents	“A Multimodal Agent System Based on a Demonstration–Inference–Execution Closed Loop” — with J. Lu, J. Zhou, B. Zhang (Borui), C. Jiang (Tsinghua, 2026.03; final review passed) “Scientific Discovery Verification via Embodied Scientific Agents” — with H. Wang, J. Zhou (Tsinghua, 2026.02; final review passed)
Service	Class President, Multimodal Intelligence Honors Track (2024 – present) Captain, Department of Automation Basketball Team

Skills & Languages

Research	bias attribution (MPD) training-free inference embodied action grounding perception–execution loops multi-agent orchestration
Engineering	Python PyTorch FastAPI LiteLLM PyQt6 MATLAB Dify
Languages	Mandarin (native) English (fluent, academic reading and writing)
